

Bipolar electrodes across all instrumentation

- Superior plasma stability
- Enhanced precision
- Durable & safe

Powered by : **STROM 2.0**

PLASMAPRO™

BIPOLAR RESECTION SOLUTION

PLASMAPRO™ electrodes have been validated to be compatible with three-leading bipolar resectoscopes from **Olympus®**, **Karl Storz®** and **Richard Wolf®**.

PLASMA RESECTION

PLASMA VAPORIZATION

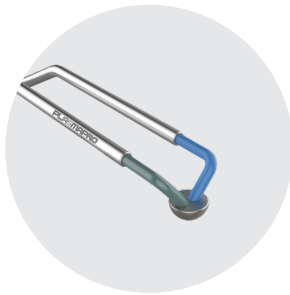

PLASMA ENUCLEATION

LOOPS COMPATIBLE FOR

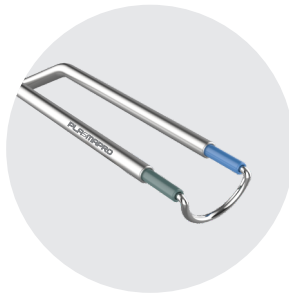

Olympus®

Storz®

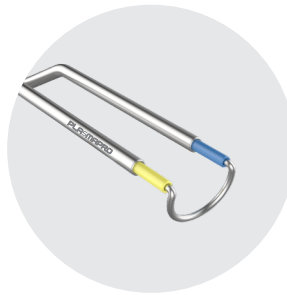

Wolf®

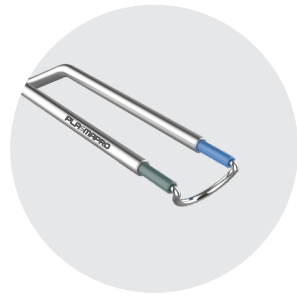

Vaporization Electrode

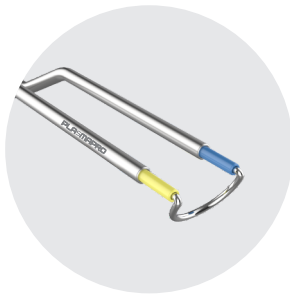

12° Medium Loop Electrode

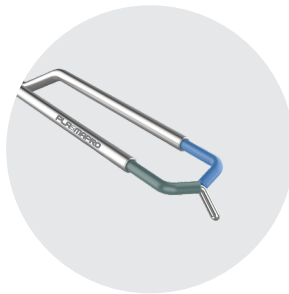

12° Large Loop Electrode

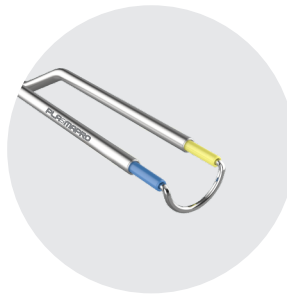

30° Medium Loop Electrode

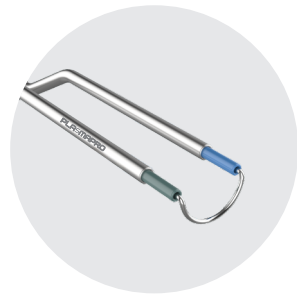

30° Large Loop Electrode

45° Needle Electrode

Band Electrode

Bladder Loop Electrode

PLASMAPRO™ offers wide range of solutions encompassing various designs based on different SIZE and LOOP ANGLE electrodes, different NEEDLE & BAND electrodes, different vaporization buttons like OVAL & ROUND electrodes and special ENUCLEATION electrodes.

- 24 Fr & 19 Fr
- 30°, 45° & 90° angle loops
- Large, Medium & Small loop sizes
- Special enucleation loops
- Special vaporization loops
- Special resection loops
